

New and Improved IRS ECO Tool Features Have Launched!

The Internal Revenue Service (IRS) added additional features to the IRS Energy Credits Online (IRS ECO) tool. These new and improved features expand the capabilities offered to clean vehicle dealers and manufacturers.

Clean Vehicle Returns

- › Dealers can report returned vehicles and return advance payments through the IRS ECO tool.

Enhanced Time of Sale Search Capability

- › Dealers can search time of sale reports by buyer names and Vehicle Identification Numbers.

Enhanced Communications

- › Two-way messaging to communicate directly with the IRS via a secure messaging platform.

Vehicle Eligibility Updates

- › Modified Qualified Manufacturer Periodic Reporting (QMPR) to include the latest battery and critical mineral requirements.
